JOURNAL OF CRYSTAL GROWTH

www.elsevier.nl/locate/jcrysgro

Subject index

Apparatus
- for Bridgman growth 278

Characterization, special
- by high resolution X-ray diffraction
- - of multiple quantum wells 188
- by reciprocal space mapping
- - of magnesium oxide films 200
Computer simulation, Monte Carlo method
- of metalorganic vapor phase epitaxy 20
- of thermoelectromagnetic convection 278
Convection 226, 239

Dendritic growth
- of decagonal quasicrystals 292
Device characterization
- electronic materials 188
- quantum structures 150, 188

Electronic materials, see Device characterization
Epitaxy, see Thin film growth
Etching
- chemical 161, 319
- photolithographic 161

Hydrodynamics, see Convection

Kinetics
- of evaporation 232
- of growth 15, 43, 69, 77, 112, 122, 161, 266, 292
- of interface control 161
- of nucleation 266

Lasers, crystals for
- electro-optic modulators 319
- metal fluoride for 10 micrometer 102
Lysozyme 112

Melt growth techniques
- by Bridgman–Stockbarger method
- - of cadmium telluride 273
- - using accelerated crucible rotation technique 226
- by Czochralski method
- - of periodic poled lithium niobate 303
- - of quasicrystals of aluminum cobalt nickel 95
- - of silicon 55
- by floating zone method
- - of neodymium silicate 298
- - of yttrium copper oxide 206
- - under reduced gravity 127
- - theory of oscillation onset 239
Microgravity 127, 232, 239
Morphological stability, of
- cast aluminum silicon alloys 43

New crystals
- gallium magnesium nitride 27
Nucleation, of
- low supersaturation in vapor growth 179
Numbers
- Peclet 138
- Taylor 226

Precursor, for
- membrane proteins 214
- zinc selenide 148

Quantum structures, see Device characterization
Quasicrystals
- Al–Ni–Co 292

Solution growth technique
- by flux method
- - of barium metaborate 104
- - of gallium magnesium nitride (new material) 27
- by low temperature method
- - of aluminum nitride 247
- - of deuterated potassium dihydrogen phosphate 319
- - of paracetamol from aqueous solution 308
- - of potassium acid phthalate 325
- - of potassium dihydrogen phosphate 122
- by vapor diffusion
- - of membrane protein 214
Stefan problem, or moving boundary problem
- in vertical gradient freeze 138
Surface structure

PII: S0022-0248(99)00622-3

- of gallium arsenide 161
- of gallium nitride 174
- of lysozyme 112
Superconductivity
- of Bi-2212 154
- of YBCO by liquid phase epitaxy 62

Thin film growth, epitaxy
- by atomic layer epitaxy
- - of zinc selenide 148
- by chemical vapor deposition
- - of silicon 77
- by contactactless physical vapor transport
- - of cadmium telluride 179
- by liquid phase epitaxy
- - of YBCO 62
- - theory of kinetics 232
- by metalorganic chemical vapor deposition
- - of aluminum arsenide 161
- - of aluminum gallium arsenide 161
- - of gallium arsenide 15, 161
- - of indium gallium arsenide 161
- by molecular beam epitaxy
- - of aluminum nitride 266
- - of gallium antimonide 255
- - of gallium diselenide 69
- - of gallium nitride 1
- - of germanium 150
- - of indium gallium arsenide 8
- - of indium phosphide 8
- - of zinc oxide 87
- by sublimation
- - of gallium nitride 174

Vapor growth technique
- by chemical transport
- - of zinc oxide 30
- - of zinc selenide 251
- by evaporation and condensation
- - of zinc selenide 35

Whisker growth
-of Bi-2212 154
